

dump

With decades of experience partnering with our customers and working in the industry, we know how to make dump trucks right. With no detail overlooked and a long list of features, our dumps can take whatever you throw at them – and will stand the test of time.

We exclusively employ high quality, premium parts from reputable suppliers. Our brilliant engineers continuously innovate to deliver the strongest, safest, most efficient designs on the market. Our manufacturing is supported by a highly-skilled team of craftsmen like no other with unparalleled expertise and over 10 years of experience on average. Our rigorous 15 point inspection is carried out on every dumps to ensure no detail is overlooked.

Quality parts, quality engineering, quality craftsmanship, and quality controls. We bring the best of everything together to deliver the ultimate long-lasting, resilient dumps that are engineered to perfection.

TYPES

- End-dump
- Pony pup
- Truck body

WALLS

- Smooth
- Post and panel

FEATURES

galvanized and painted frame

Frame completely dipped in molten zinc providing four layers of protection to reduce corrosion.

swivel points mounted outside of main beams

Enhances stability.

two-finger door-locking mechanism with stainless hook plate

Eliminates the need for a compression lock at the bottom of the door.

fully welded coupler plate

Improves rigidity providing a longer lasting, more secure connection.

sloped dog house

Creates low friction while unloading.

extruded side panels

Maximizes load space. Available on both smooth and post and panel walls.

extruded door posts

Enables thicker areas.

extruded heavy-duty top rails

Stronger, more durable construction.

100% LED lights

Safer and longer lasting to reduce replacement costs.
