

DI-MOND

VIKING

Manufacturing vans for nearly 50 years, our priority has been and will always be quality. With the highest life-expectancy in the industry, our vans will shatter your expectations.

We exclusively employ high quality, premium parts from reputable suppliers. Our brilliant engineers continuously innovate to deliver the strongest, safest, most efficient designs on the market. Our manufacturing is supported by a highly-skilled team of craftsmen like no other with unparalleled expertise. Our rigorous 25 point inspection is carried out on every van to ensure no detail is overlooked.

DI-MOND

UNIQUE FEATURES

VIKING

Two-finger Door Locking Mechanism with Stainless Hook Plate

Eliminates the need for a compression lock at the bottom of the door.

Swivel Points Mounted Outside of Main Beams

Enhances stability.

Extruded Heavy-duty Top Rails

Stronger, more durable construction.

Fully Welded Coupler Plate

Improves rigidity providing a longer lasting, more secure connection.

Sloped Dog House

Creates low friction while unloading.

Extruded Side Panels

Maximizes load space. Available on both smooth and post and panel walls.

Galvanized & Painted Frame

Frame completely dipped in molten zinc providing four layers of protection to reduce corrosion.

Extruded Door Posts

Enables thicker areas.

100% LED Lights

Safer, and longer lasting to reduce replacement costs.
