Driving Innovation, Delivering Excellence.

DI-MOND Unveils Game-Changing Investment in Cutting-Edge Truck Body Facility!

November 4, 2024 – (Stoney Creek, Hamilton) – DI-MOND, a pioneer in the transportation equipment industry, has announced a major new investment with the launch of a state-of-the-art truck body manufacturing facility. This game-changing facility represents a bold step forward in DI-MOND's commitment to innovation and excellence, designed to deliver superior, high-performance truck bodies to meet growing market demand.

Our new facility located at 317 South Service Road, with an industrial space with 45,000 SQ FT, 4.66 acres, and 24' foot ceilings.

Innovative Solutions for a Global Market

The new facility will incorporate the latest advancements in manufacturing technology, offering unparalleled efficiency and precision in truck body production. With this cutting-edge investment, DI-MOND is poised to revolutionize the truck body industry, delivering products built to the highest standards of quality and durability. The facility's streamlined processes will enable DI-MOND to meet tight delivery deadlines, producing fully assembled, inspected, and ready-to-use truck bodies.

Executive Insight

"Today marks a transformative moment for DI-MOND as we take our expertise in design and engineering to the next level," said **Chris Di Lillo, President of DI-MOND Truck Body Co.** "This investment reflects our relentless commitment to providing our customers with the most advanced, durable, and innovative truck body solutions available on the market."

Why DI-MOND Matters
